

# GLOBAL PROPTech CONFERENCES

---

## FOR AUTUMN 2017

In Association With

PropTech  
Consult

# INTRODUCTION

Welcome to the first edition of The PropTech Conferences guide which is published in association with the UK PropTech Association who have supported its release. Hopefully most are included in here but if you see any gaping holes, please let me know and I will update.

PropTech, in terms of both discussion and global investment levels, has seen an unprecedented rise in the last five years and it seems a long time ago that you were scratching around for any mention of the term on social media, let alone conferences discussing the subject matter.

Now, as is evident in this handy PDF, PropTech is at the forefront of the property agenda, featuring strongly in more traditional events, like MIPIM and even has conferences dedicated to the very topic itself - expect some very exciting developments over the next few months.

I will leave you with a definition that I have worked on with Professor Andrew Baum, author of the first academic paper on PropTech. We decided PropTech should be defined as:

*“PropTech is one small part of the wider digital transformation of the property industry. It describes a movement driving a mentality change within the real estate industry and its consumers regarding technology-driven innovation in the data assembly, transacting and design of buildings and cities”*

Given we are talking about PropTech being both a mentality and technology shift, expect a lot more conferences to come in the New Year!

Best wishes

PS. if I have missed out some conferences please do let me know - I will update the list constantly.

THANK  
YOU
